DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 22-30 and 31-34, drawn to a vacuum apparatus, respectively, classified in class 15, subclass 344.
- II. Claims 35-37, drawn to a method of separating debris from rock in a dry environment, classified in class 56, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice another and materially different process, such as to vacuum grass or artificial turf (i.e., plastic grass or carpet) to remove debris from a sports playing complex.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
